

D6267

Retractable Meeting Table Connectivity Box

Description

The D6267 Conference Table Pop-Up Socket offers a compact, flush-mount connectivity solution for modern meeting spaces. Designed for concealed under-table cable management, it simplifies wiring for conference units and peripherals. A soft press on the cover releases the mechanical latch, initiating a smooth, gas-assisted lift to reveal the connection panel. After use, simply push it back down to sit flush with the tabletop—maintaining a clean, seamless, and clutter-free aesthetic.

Features

- Specially engineered concealed socket for conference rooms with pre-installed embedded cabling systems.
- Purpose-built for connecting terminals and units of intelligent digital conference systems.
- Sits completely flush with the tabletop when closed, maintaining a clean, clutter-free, and elegant environment.
- Features a gas-strut lifting mechanism with a mechanical latch for smooth pop-up operation, paired with an angled interface panel for convenient plugging.
- Crafted with an anodized brushed finish for enhanced scratch resistance, long-lasting durability, and a premium visual appeal.

Specifications

Model	D6267
Structure	Pop-up type
Interfaces	2 × 8-pin DCN female connectors, 1 × power socket
Rated Voltage	110–240 VAC
Rated Current	10 A
Operating Temperature	0–45°C
Product Dimensions	175 × 130 × 136 mm (L × W × H)
Cutout Dimensions	166 × 121 × 135 mm (L × W × D)
Product Weight	1.45 kg
