

DSP572

20W Square Lighted Lawn Speaker

Description

This outdoor speaker combines a realistic rock-style design with integrated audio and lighting functions. With a rated power of 20W, it supports 70V/100V operation, allowing flexible configuration for different installation needs. The coaxial waterproof driver delivers clear, smooth sound across an effective frequency range of 100 Hz to 20 kHz, ensuring reliable performance in outdoor environments. The enclosure is made of durable resin with good resistance to deformation and fading, and a low-power neutral white light is built in for added functionality. It is well-suited for use in residential communities, villas, landscape parks, and lawn areas in public squares.

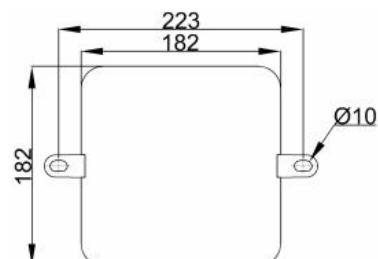

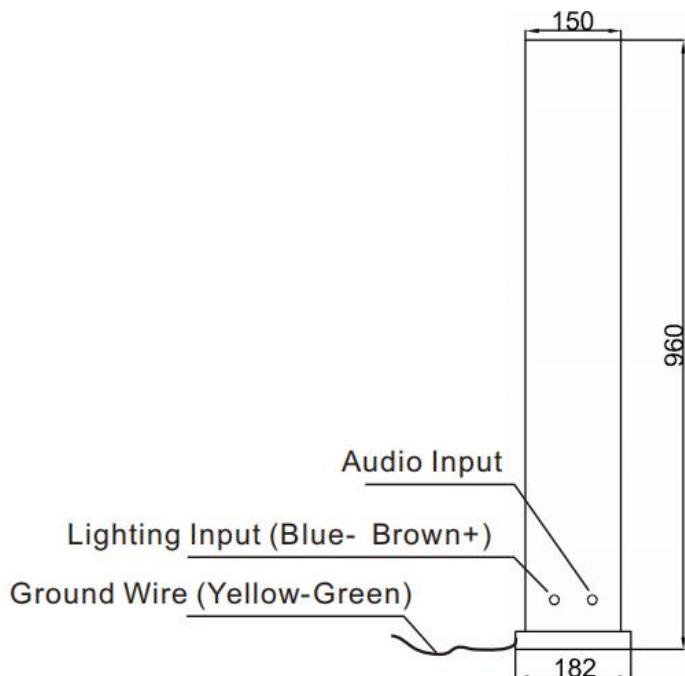

Features

- Realistic rock-style design for outdoor blending
- Rated power: 20W, support 70V/100V
- Sensitivity: 86±2 dB; Max. SPL: 99±2 dB
- Frequency response: 100 Hz–20 kHz
- Built-in neutral white light, 3 W (AC 85–240 V)
- Coaxial waterproof speaker driver
- High-strength resin enclosure, fade-resistant
- Net weight: approx. 6.9 kg

Specifications

Model	DSP572
Rated Power	20W
Line Voltage	70V 100V
Sensitivity	Black-Blue: 10W Black-White: 20W
Max. SPL	Black-Blue: 20W
Frequency Range	86±2dB
Lighting	99±2dB
Lighting Input Voltage	100Hz-20kHz
Lighting Power Consumption	Neutral White Light
Net Weight	AC85-240V
	3W
	Approx. 6.9kg
