

PK218S

Passive Subwoofer

Description

The PK218S is a high-performance subwoofer designed to complement line array systems, delivering deep, punchy bass from 35 Hz to 300 Hz. Equipped with 2×18" long-excursion woofers, it offers 1200 W rated power and a maximum SPL of 131 dB, ensuring fast, dynamic low frequencies with excellent impact and clarity. Its robust cabinet and user-friendly design make it ideal for auditoriums, conference halls, high-end KTV rooms, bars, and other venues requiring extended low-frequency coverage.

Features

- Features dual high-power 18-inch long-excursion woofers, delivering fast, deep and powerful low-frequency performance with excellent punch and impact.
- The cabinet is made of professional-grade high-density plywood and finished with a wear-resistant polyurea coating, making it suitable for low-frequency reinforcement in entertainment venues such as high-end KTV rooms and bars.
